ICGEB International SEMINAR PROGRAMME 2017

Monday, 16 January 2017 | 11:00 am | ICGEB Seminar Room, W building | Padriciano, 99, Trieste, ITALY

Luka AUSEC

*Genialis,
Ljubljana, SLOVENIA*

Klemen HROVAT

*Genialis,
Ljubljana, SLOVENIA*

The seminar will be composed of two parts. The first part will be dedicated to a presentation by a representative from Genialis, a bioinformatics software company based in Slovenia and the US. The lecture will focus on the past, present and future hurdles in bioinformatics, both in routine analyses and in support of state of the art research. By focusing on a typical journey of data from a sequencer to a publication-ready figure, we'll discuss possible solutions to major bottlenecks, such as cloud/on premise deployments, data management and annotation, version control and reproducibility, data reuse and sharing. Particular ways of how Genialis software tackles this issues will be presented. In the second part, an open Q&A session will be moderated and questions and opinions from the audience will be debated. We'll try to relate the lecture to particular situation of the Institute and its research groups.

“Current challenges in bioinformatics”

Host: E. Buratti

Registered seminars are available on iTunes U and ICGEB Podcast at:
