The meeting brings together the Editorial Board of The FEBS Journal, which comprises scientific leaders spanning a wide range of topics and disciplines within the Life Sciences. The aim is to provide a forum for discussing the major challenges in their respective fields that will need to be addressed in the coming years.

The meeting is intended to provide a general overview that will be of value to Ph.D students and early career researchers seeking guidance for future research directions and priorities.

Organisers
Lawrence Banks (ICGEB Trieste, Italy)
Seamus Martin (The FEBS Journal - Cambridge, UK)

Concept
The meeting brings together the Editorial Board of The FEBS Journal, which comprises scientific leaders spanning a wide range of topics and disciplines within the Life Sciences. The aim is to provide a forum for discussing the major challenges in their respective fields that will need to be addressed in the coming years.

The meeting is intended to provide a general overview that will be of value to Ph.D students and early career researchers seeking guidance for future research directions and priorities.
