Web https://www.icgeb.org/infectious-diseases-workshop-2020/

This meeting aims to gather experts in the field of infectious diseases affecting resource-limited tropical regions for a broad discussion of state-of-the-art and the solutions for improved vaccines and therapeutics. Topics will include:

- Pathogenic viruses, bacteria and protozoa
- Host-pathogen interactions
- Emerging concepts in vaccines and therapeutics
- Animal reservoirs and vectors

Participants
- Researchers involved in the topics of the meeting, infectious diseases with interests in basic research, vaccine development, epidemiology, diagnostics, therapy, vector control
- Short talks and posters from participants
- Students and junior scientists are welcome to attend

Funding
- Participants are expected to cover their own travel and living costs
- A limited number of grants, covering accommodation and local hospitality of the duration of the Meeting, are available to a selected number of nationals of ICGEB Member States
- Limited travel contribution will additionally be available from the local organisers and external sponsors for selected students/junior scientists
