**Web** <https://www.icgeb.org/4th-icgeb-meeting-on-hpv-2020/>

The aim of this meeting is to bring together international scientists and clinicians involved in investigating and treating various aspects of HPV-induced malignancies. This will give them an opportunity to interact and share their scientific and clinical expertise, which will promote their collaborations and further assist in preventing and fighting cancer. Topics will include:

- Virus – Host interactions
- Epidemiology/HPV vaccination programs
- HPV infections at different anatomical sites
- Cellular transformation
- Vaccines, immunology and therapies
- HPV diagnostics and biomarkers
- Beta-HPV carcinogenesis

### Participants

- Researchers and clinicians involved in the field of HPV related cancers
- Junior scientists, students and medical residents are welcome to participate
- Presentations will be divided in oral and poster sessions

**Registration** <https://events.irb.hr/Upcoming-Events/ICGEBHPV2020>

### Funding

Participants are expected to cover their travel and accommodation costs

- There will be grants available which will cover accommodation and registration fee for a number of **ICGEB Member States** nationals currently residing outside of Croatia
- FEMS Early Career Scientist Meeting Grants will be available for young scientists
- Limited travel supports may be also available from the local organizers and meeting sponsors for a number of students/ junior scientists and clinicians

**ICGEB Grant application Deadline** <https://www.icgeb.org/application-4th-icgeb-meeting-on-hpv-2020/>  
15 July 2020
