Course “Unveiling biological networks by cutting-edge proteomics tools”
Rosario, ARGENTINA

Organiser:
Germán Rosano (Instituto de Biología Molecular y Celular de Rosario, IBR-CONICET-UNR, Santa Fe, Argentina)

Co-organiser:
Nicolás E. Blanco (Center of Photosynthetic and Biochemical Studies, Faculty of Biochemical Science and Pharmacy, National University of Rosario, CEFobi/UNR-CONICET, Rosario, Santa Fe, Argentina)

Contact rosano@ibr-conicet.gov.ar, blanco@cefobi-conicet.gov.ar
Web https://www.icgeb.org/proteomics-course-argentina-2021/

The course will focus on the latest advances in proteomic strategies, especially in the area of protein-protein interactions and proteome characterization. Lectures will cover novel techniques in proteomics, and experimental sessions will focus on sample preparation, mass spectrometer operation, and data analysis. Topics will include:

- Proteomics
- Interactomics
- Data analysis in proteomics
- Sample preparation for mass spectrometry
- Signalling pathways

Participants
- Researchers planning to set up proteomic strategies in their studies
- Flash-talks will be organized
- Early career researchers are welcome to attend
- Priority will be given to researchers with basic knowledge in mass spectrometry
- Participants are expected to bring their own laptops

Funding
- Participants are expected to cover their own travel and living costs
- A limited number of grants, covering accommodation (twin-share), and living costs for the duration of the course are available to a selected number of nationals of ICGEB Member States.
- Limited travel contributions will be available for selected participants

Online application https://isg.icgeb.org/auth/login
Deadline 23 August 2021 - deadline extended
