

## VACANCY NOTICE

### **Junior Research Fellow (JRF) Position**

One Junior Research Fellow (JRF) position is available in the ICGEB Translational Health Group for a DBT sponsored project. The project is a part of a DBT consortium on Sepsis related mortality in neonates in India. The title of the project is "A metabolomic approach to understanding immunometabolic deficits predisposing to neonatal sepsis". Initially, this position is available for the period of six months and based on the performance of the candidate can be further extended.

### **Educational Qualification:**

JRF candidates should hold a MSc in Biological Sciences/Chemistry.

Candidates with prior research experience in patient biofluid handling, and biochemistry will be preferred.

Interested candidates should submit their full, updated Curriculum Vitae in **TWO pages** with a detailed description of research experience by **19<sup>th</sup> March 2023**, addressed to Dr. Ranjan Nanda.
