19th International p53 Workshop

13-16 May 2024 | Trieste, ITALY

Groundbreaking research and cutting-edge advancements in the field of the most studied human gene and most frequently mutated gene in cancer, will take center stage at the 19th International p53 Workshop. The event will gather leading scientists, clinicians, and researchers from around the world providing a unique opportunity to delve into the latest discoveries and innovations related to TP53 biology and explore the intricate role of TP53 in cancer and its potential for transformative impact in oncology.

SPEAKERS

Laura Attardi, Stanford, USA; Matthias Dobbelstein, Göttingen, Germany; Benjamin Greenbaum, Memorial Sloan Kettering Cancer Center, USA; Wei Gu, New York, USA; Andrei Gudkov, New York, USA; Pierre Hainaut, Grenoble, France; Curtis Harris, Bethesda, USA; David Lane, Stockholm, Sweden; Laurent Le Cam, Montpellier, France; Arnold Levine, Princeton, USA; Scott Lowe, New York, USA; Guillermina Lozano, Houston, USA; Hua Lu, New Orleans, USA; Xin Lu, Oxford, UK; David Malkin, Toronto, Canada; Maureen Murphy, Philadelphia, USA; Moshe Oren, Rehovot, Israel; Eugenia Piddini, Bristol, UK; Carol Prives, New York, USA; Kanaga Sabapathy, Singapore; Galina Selivanova, Stockholm, Sweden; Andreas Strasser, Melbourne, Australia; Karen Vousden, London, UK; Klas Wiman, Stockholm, Sweden.

TOPICS

- p53 function and dysfunction and tissue microenvironment
- p53 and metabolism
- p53 and inflammation and immunity
- p53 isoforms and family members
- Targeting p53 in human disease

ORGANISERS

Giannino Del Sal (University of Trieste, ICGEB Trieste and IFOM, Milan, Italy); Lawrence Banks (ICGEB, Trieste, Italy); Giovanni Blandino (Regina Elena National Cancer Institute, Rome, Italy); Gerry Melino (University of Tor Vergata, Rome, Italy).
