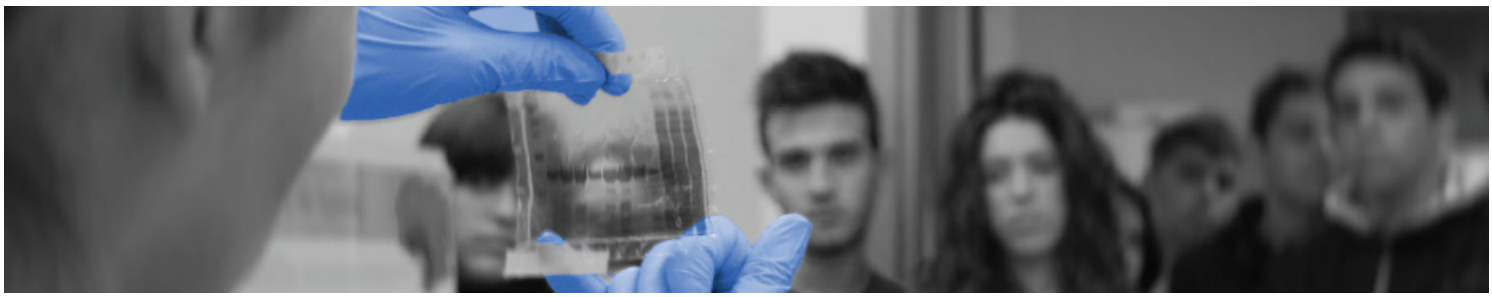
ICGEB International Centre for Genetic Engineering and Biotechnology



GUIDED TOUR OF THE LABORATORIES

The ICGEB offers a guided tour of the laboratories with research scientist and students. The tour includes a brief introduction on the Centre in the ICGEB Seminar Room, followed by the visit in the labs with practical demonstration. To book your visit please fill in the form below.

Institute name		School Class	
Name of the Teacher		Subject	
Mobile phone		Email	
Number of students			
Day (1st choice)		alternative Day (2nd choise)	
Language (English or Italian)			
Time	09:30-11:30	15:00-17:00	

During school visits, ICGEB researchers and volunteers will introduce students to the world of modern biology and biotechnology, exploring scientific discoveries and their relevance to everyday life and society.

Depending on the researchers participating in each visit, topics may include molecular biology and the flow of genetic information; genetic engineering and gene therapy; inheritance and genetics; the immune system and autoimmune diseases; cardiovascular health; neurodegenerative diseases; viruses and their mechanisms of infection and survival; environmental microbiology and sustainability; and bioinformatics. The topics and activities will vary according to the availability, expertise, and research interests of the participating volunteers.
